<b>Office Action Summary</b>	<b>Application No.</b> 10/624,234	<b>Applicant(s)</b> RITLAND, STEPHEN	
	<b>Examiner</b> DAVID COMSTOCK	<b>Art Unit</b> 3733	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12 August 2009 has been entered.

### ***Response to Amendment***

The declaration filed on 12 August 2009 under 37 CFR 1.131 is sufficient to overcome the Grimm et al. references (US 2004/0172044) and (US 2004/0122305) cited in the rejection, as the evidence shows that Applicant's provisional application 60/397,191, from which the present application claims priority, was filed before the earliest filing date of either of the Grimm et al. references. However, upon continued examination and further consideration, new grounds of rejection have been discovered and are set forth below.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3733

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3-9, 11-20, 26-29, 34 and 35 are rejected under 35 U.S.C. 102(b) as being anticipated by Glossop (6,203,543).

Glossop discloses the claimed invention including a securing mechanism consisting of one bone screw 22, a body, e.g., 14, 18, a projecting attachment post 20 and image tracker 8, and a stabilizing pin 54 (see, e.g., Figs. 1, 2D, 3E and 3F; and col. 4, lines 66 and 67; col. 5, lines 18-27). The body has first and second apertures on surfaces of the body that can be considered the top, bottom and/or side depending on the relative orientation of the device or of the user relative thereto, and a passageway defined therebetween. The securing mechanism is inserted through the passageway. The stabilizing projection is positioned on a bottom surface of the body (see Fig. 3E). The passageway comprises a flange portion (e.g., the thread/shoulder portion, see, e.g., Fig. 1). A set screw, e.g. 58, secures the securing mechanism in the passageway.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 30-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Glossop (6,203,543).

Glossop discloses the claimed invention including a teaching of using a set screw to removably secure an anti-rotation feature relative to the device (see, e.g., Fig. 3F) but does not explicitly recite making the pin removable. However, it would have been obvious to one having ordinary skill in the art at the time the invention was made to make the pin 54 removable, e.g., via a set screw to allow a simple and secure connection, since it has been held that constructing a formerly integral structure in various elements involves only routine skill in the art. *Nerwin v. Erlichman*, 168 USPQ 177, 179.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Comstock whose telephone number is (571) 272-4710 (a detailed message should be left if Examiner is unavailable). If attempts to reach the Examiner by telephone or voicemail are unsuccessful, the examiner's supervisor, Eduardo Robert, can be reached at (571) 272-4719. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
